

Health care redefined

Comprehensive. Innovative. Reimagined with you in mind.

At Kaiser Permanente, your doctors, hospitals, and health plan work together to provide a better kind of care experience that's constantly evolving to fit your life. Because to us, your busy schedule isn't a barrier: It's a reason to make good health easy.

Leading the way for mental health

Customized care plans – Individual or group therapy, psychiatry visits, wellness coaching – all tailored to your needs and goals.

More doctors in more places – \$700 million toward new mental health facilities and therapists for easier access to care.

On-demand support – 24/7 advice, online health assessments, and self-care tools to help you find calm and feel better.

Quality care for growing families

Focus on fertility – Embryologists and clinic staff can help start your journey with in vitro fertilization, genetic services, and more.

Personalized delivery experience – Share your birth plan with your ob-gyn or certified nurse-midwife. And control your comfort in our spacious birthing suites.

A faster, safer return home – From skin-to-skin contact to lactation consultations, we promote better bonding and recovery.

Better care starts with a better experience. Explore more at kp.org/builtforyou.
